## Summary

Interdisciplinary and detail-oriented software engineer with Agile experience, skilled in product development, scalable APIs, and enterprise integrations. Recognized for delivering reliable solutions and bridging technology with business needs. Fast learner dedicated to continuous improvement, with long-term goals in solution architecture and entrepreneurship.

## Experience

Integration Consultant

**IWConnect** • Nov 2025 - Current

Working on enterprise integration initiatives across multiple platforms, including **SnapLogic** and **MuleSoft**. Designing and implementing integration patterns, data transformations, and connectivity solutions for complex system landscapes.

Integration Developer

**Action** • Jul 2023 - May 2024

Designed and optimized **MuleSoft-based integration workflows** to improve reliability and scalability of core services. Collaborated with business process owners to streamline **cross-departmental** systems and delivered **critical production patches** ensuring stable operations.

Solution Engineer - Consultant

**Devoteam** • Oct 2022 - May 2024

Architected and delivered an **event-driven integration solution** for Mergers & Acquisitions, enabling seamless data consolidation across multiple systems. Developed an RPA solution that **reduced manual regulatory reporting effort by 60%** and collaborated with clients to align business needs with technical designs.

Quality Assurance Engineer

**Delivero** • May 2020 - Oct 2020

Led quality assurance efforts across multiple projects while **supporting development and design teams** through Agile workflows. Designed an organization-wide **agile system** to improve project tracking, visibility, and team coordination.
